Numbing Cream Available for Bulk Use

Wells Pharmacy Network Now Offers Numbing Cream From our FDA Registered 503B Outsourcing Facility

Application of topical anesthetics prior to performing dermatologic procedures has proven to decrease pain and discomfort associated with these procedures. Benzocaine/Lidocaine/Tetracaine (BLT) is a triple anesthetic cream commonly used to numb the area where a patient will be undergoing an aesthetic procedure that requires needle sticks such as Botox and dermal fillers, as well as laser hair removal and vein treatment.

Wells Pharmacy Network offers prescribers the opportunity to order numbing cream for office use from our FDA Registered 503B Outsourcing Facility.

Medication	Strength
Benzocaine/Lidocaine/Tetracaine (30gm) Topi-Pump®	20%/6%/4%
Benzocaine/Lidocaine/Tetracaine (120gm) Topi-Pump®	20%/6%/4%

Contact your Wells Pharmacy Network Account Team for more information or to place your order. **New to Wells?** Email us at info@wellsrx.com or call us at 800-622-4510 for assistance.
