

### Improving the Look and Feel of Your Skin

Your skin is one of the first things people notice when they meet you. Many people strive to keep a beautiful complexion and treat their skin right. But aging, genetics, environment, and health can all take a toll on how your skin looks. This can also impact how you feel about yourself and your appearance.

Wells Pharmacy Network offers a variety of creams to address common aesthetic issues and help you achieve a look you love. Made with pharmaceutical grade ingredients, these are formulations you can trust that are produced with care and precision.

### Supporting Your Skin's Health

The following are some of the formulations available through Wells Pharmacy Network to enhance the look and feel of your skin.

- Hydrate & Tighten** – If you're looking to hydrate and brighten your skin while increasing its firmness, ask your doctor about our cream that includes Ascorbic Acid, CoQ10, DMAE, Estriol, and Tretinoin. These ingredients work together to combat wrinkles, sun damage, and inflammation by supporting anti-aging, collagen production, and firmer skin.
- Firmness & Fine Lines** – Feel like your skin is starting to sag and wrinkle? Our combination of Estriol, DMAE, and Hyaluronic Acid supports improved elasticity, firmness, and moisture for plumper, younger looking skin.
- Brown Spots** – Struggling with hyperpigmentation that creates a noticeable difference in your skin tone? Our cream that combines Hydroquinone and Vitamin D may be able to help by gently bleaching pigmentation for a more consistent appearance.

Take pride in your appearance and feel more confident in your own skin with help from these aesthetic dermatology formulas from Wells Pharmacy Network. Talk to your doctor today to find out if these creams may be right for you.
